

# Sujal Chaudhary

+918923492332 chsujalm@gmail.com linkedin github

## EDUCATION

Gautam Buddha University, Greater Noida, India

Bachelors of Technology in Computer Science

Aug 2021 - May 2025

CGPA: 8.37/10

## TECHNICAL SKILLS

**Languages:** Java, JavaScript

**Library/Frameworks:** React.js, Next.js, Node.js, Express.js, Tailwind CSS

**Miscellaneous:** HTML, CSS, MongoDB

**Soft Skill:** Communication, Continuous learning, Managing multiple tasks efficiently

## EXPERIENCE

YHills EdTech Pvt. Ltd.

June 2024 - August 2024

Full Stack Web Development intern

Remote

- Engineered e-commerce, pizza store, and someother websites leveraging **React.js**, **Node.js**, **Express.js** and **MongoDB**, achieving exceptional performance and functionality.
- Implemented responsive, user-friendly interfaces with **Tailwind CSS** and **React Hooks**, enhancing user experience and engagement.
- Collaborated in agile development teams to ensure timely project delivery and **effective feature integration**, leading to improved operational efficiency.

## PROJECTS

GenText AI Content Generator

November 2024

- Developed a GenText AI content generator website using the **MERN stack**, integrating advanced AI capabilities through the **GoogleAI API** for seamless content generation
- Implemented **Stripe API** for secure and efficient payment processing, ensuring a smooth and reliable user transaction experience
- Designed an intuitive and visually appealing user interface**, ensuring both aesthetic appeal and seamless functionality

create-server-side-app

October 2024

- Engineered create-server-side-app **npm package**, a **command-line interface (CLI) tool** that automates the setup of backend applications using a predefined **Model-View-Controller (MVC)** architecture, reducing manual project configuration time and is **installed by 140+ users**
- Enhanced efficiency by implementing features like **customizable project names**, **template-based backend setup**, and a **quick-start command** to streamline the backend development process

MAYA AI Chatbot

August 2024

- Developed AI chatbot, MAYA, using **voiceflow** to provide personalized skincare recommendations tailored to individual needs and preferences. Integrated MAYA with a user-friendly website for seamless access and interaction
- Curated a comprehensive knowledge base of skincare information, including product recommendations, treatment options, and advice on various skin conditions
- Trained MAYA on this extensive database to deliver accurate, informative, and helpful responses to user queries

Simple Quiz App- using ChatGPT

June 2024

- Build a quiz website **entirely using ChatGPT and React.js**, showcasing the ability to leverage AI tools for web development
- Added an innovative feature where the quiz automatically ends if the user exits fullscreen mode, providing an additional challenge and improving user engagement
- Designed with simplicity in mind, ensuring a clean and user-friendly interface that prioritizes ease of use and accessibility
